## **ACKNOWLEDGEMENT**

I have a great pleasure in representing this project report entitled “**HITCH & HUGS**” and I grab this opportunity to convey my immense regards towards all the distinguished people who have their valuable contribution in the hour of need.

I like to extend my gratitude to our beloved Principal **DR. SONALI PEDNEKAR** for her timely and prestigious guidance.

I take this opportunity to thank **PROF. MRS. REENA SHAH**, Coordinator of the Department and all the professors of the Department of Computer Science of Mulund College Of Commerce, for giving me an opportunity to complete this project and the most needed guidance throughout the duration of the Programme.

I am extremely grateful to my project guide **PROF. MS. PRATIKSHA HARWALKAR** her valuable guidance and necessary support during each phase of the project. She was the source of continuous encouragement as each milestone was crossed.

A special thanks to the University Of Mumbai for having prescribed this project work to me as a part of the academic requirement in the Final year of Bachelor of Science in Computer Science.

Finally, I also owe to my fellow friends who have been a constant source of help to solve the problems that cropped up during the project development process.

## **1. TITLE**

Title of the Project: Matrimonial/Dating Website.

Type of Project: Website Application.

Developed by: Sahil Sahu.

## **2. Introduction**

For almost over a decade, matrimonial websites have been taking a huge toll in the online website category. Ever since online matrimonial sites have been introduced to the people, matchmaking has been way too easier than calling/contacting priests and pandits and relying on them for one's better half. Relying on Pandits, priests or Family relatives is one of the oldest ways of getting your children hitched with someone for the rest of their lives, but Online matrimonial services have cut down this struggle of contacting and relying on everyone when you can do the same thing all by yourself.

People don't really trust the matches they get online on matrimonial websites even though the matches they come across themselves are 100% Genuine and as real as the person who's browsing the website for matchmaking is. The orthodox thinking and a little bit backward mindset of local people has always taken the decision of online matchmaking for a toss. But, over the last few years online matchmaking and matrimonial websites have caught quite a bit of buzz in the community as a reliable companion for searching their better half.

### **2.1 Features**

- Huge variety of display of various profiles.
- Attractive Page Layouts & Designs.
- Lesser unwanted input of information which can be misused.
- 100% Safety & Privacy assurance.

### **2.2 Description of Current System :**

These websites are similar to the mainstream matrimonial websites where it's really simple to create and maintain an account and contact with other people and other profiles. These websites have taken the basic user information input, process and display the information of other profiles on their feed through a simple algorithm.

### **2.3 Limitations of Current System :**

- Involvement of Fake IDs which can access the sensitive user information and might misuse it later on in the near future against that particular user.
- No support or positive response towards the LGBTQ+ community.
- Emphasizes majorly on the two most considered genders viz. Male & Female.

### **2.4 Description of Proposed System :**

The proposed website emphasizes more on the security of each user that enters and registers on it. It makes the user go through few quality checks which are essential for better security concerns. This website

involves an algorithm which displays information that is processed on the basis of the gender selection of that user.

### **2.5 Advantages of Proposed System :**

- Usage of more security checks in order to ensure the secrecy and complete confidentiality of the user information.
- A huge support and hands reaching out to the LGBTQ+ community .
- Safer space for People of the Pride community and an overall, equal amount of focus over every gender type that has come up since the scrapping of Section 377 in the country.

## **3. REQUIREMENT SPECIFICATIONS :**

### **3.1 Software Requirement :**

- Any type of Browser (E.g.: -Google Chrome, Firefox, etc)
- Application Software :  
Front-End : HTML, CSS  
Back-End : PHP,SQL

### **3.2 Hardware Requirement :**

- 800MHz or higher CPU
- Mali 400, Adreno 205, Tegra 2, SGX 540 or higher GPU
- Minimum Storage space (ROM) of 50-60 MB
- Minimum RAM of 512MB
- Touchpad, Gyroscope, Internet access, Keyboard.

### **3.3 Data Requirement :**

- Username(String)
- Password (String)
- Email ID (String)

### **3.4 Fact Finding Questions :**

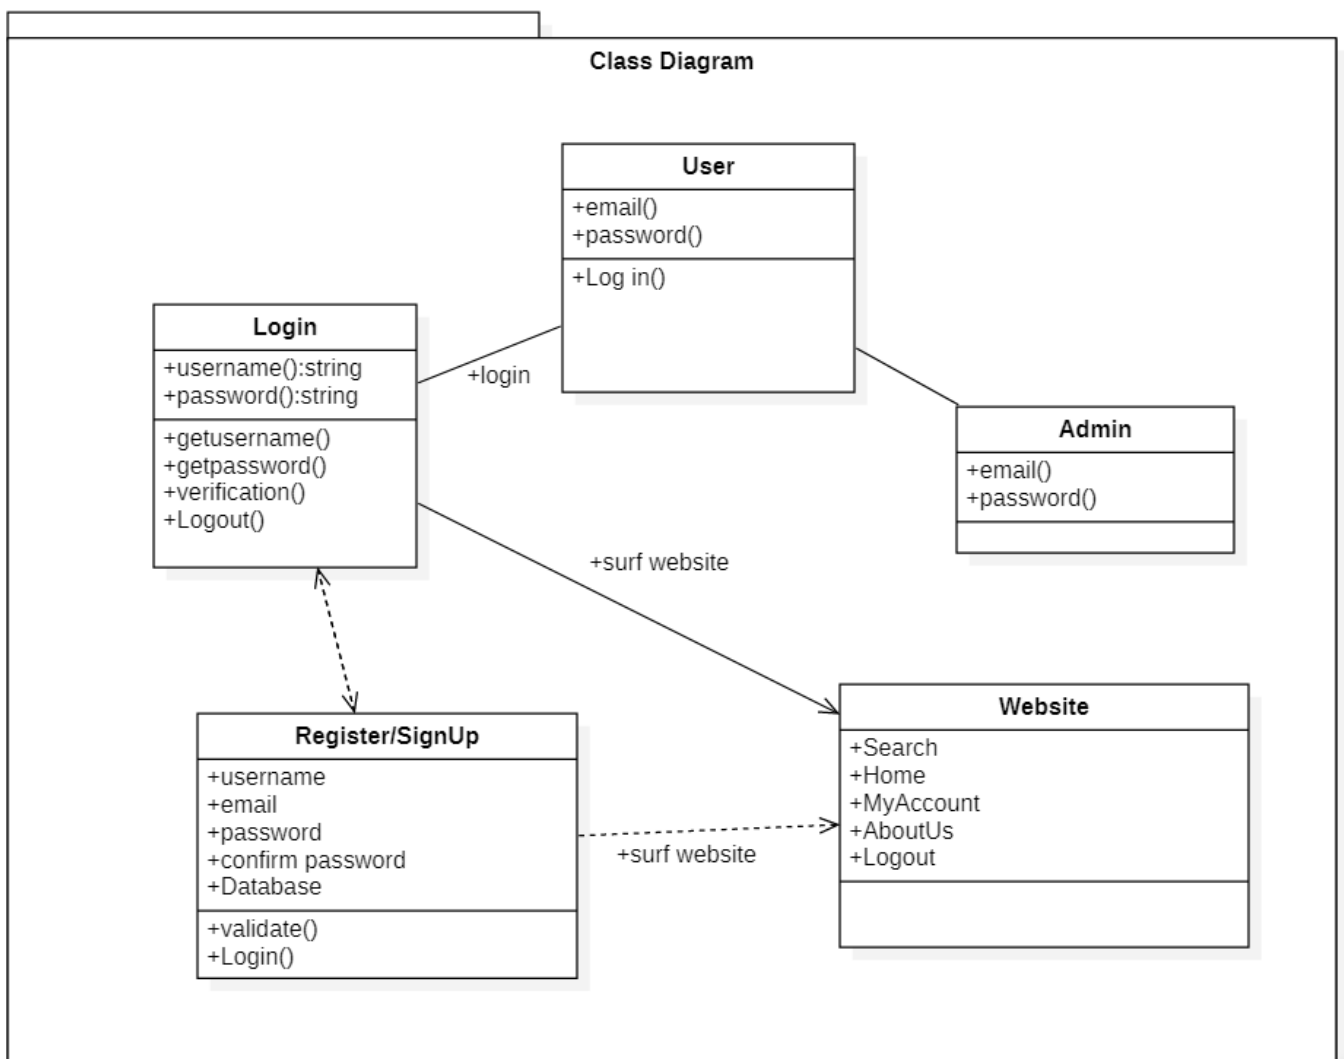

- How is your website different than other Matrimonial/Dating websites ?
- Why is Gender equality in terms of matchmaking a necessity in today's generation ?
- Is supporting the LGBTQ+ community considered as going against the culture/tradition that has been followed since the beginning of mankind?
- Is surfing your website an instigation for people with the obvious genders to lookout for other options than the obvious ones ?

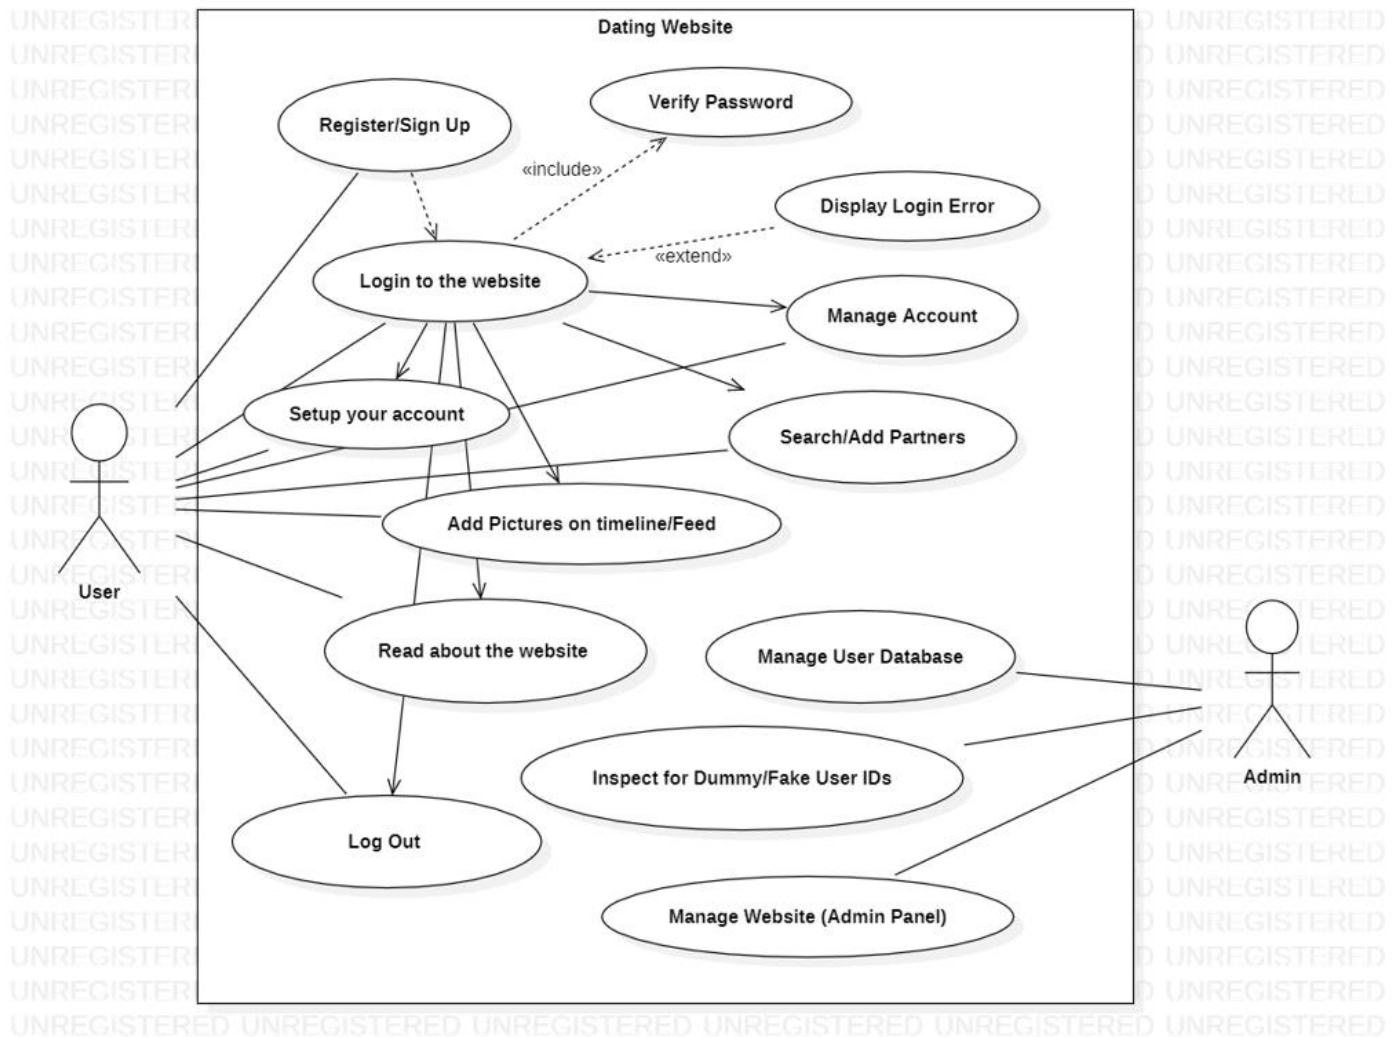

## **4. SYSTEM DESIGN DETAIL :**

### **4.1 : Event Table :**

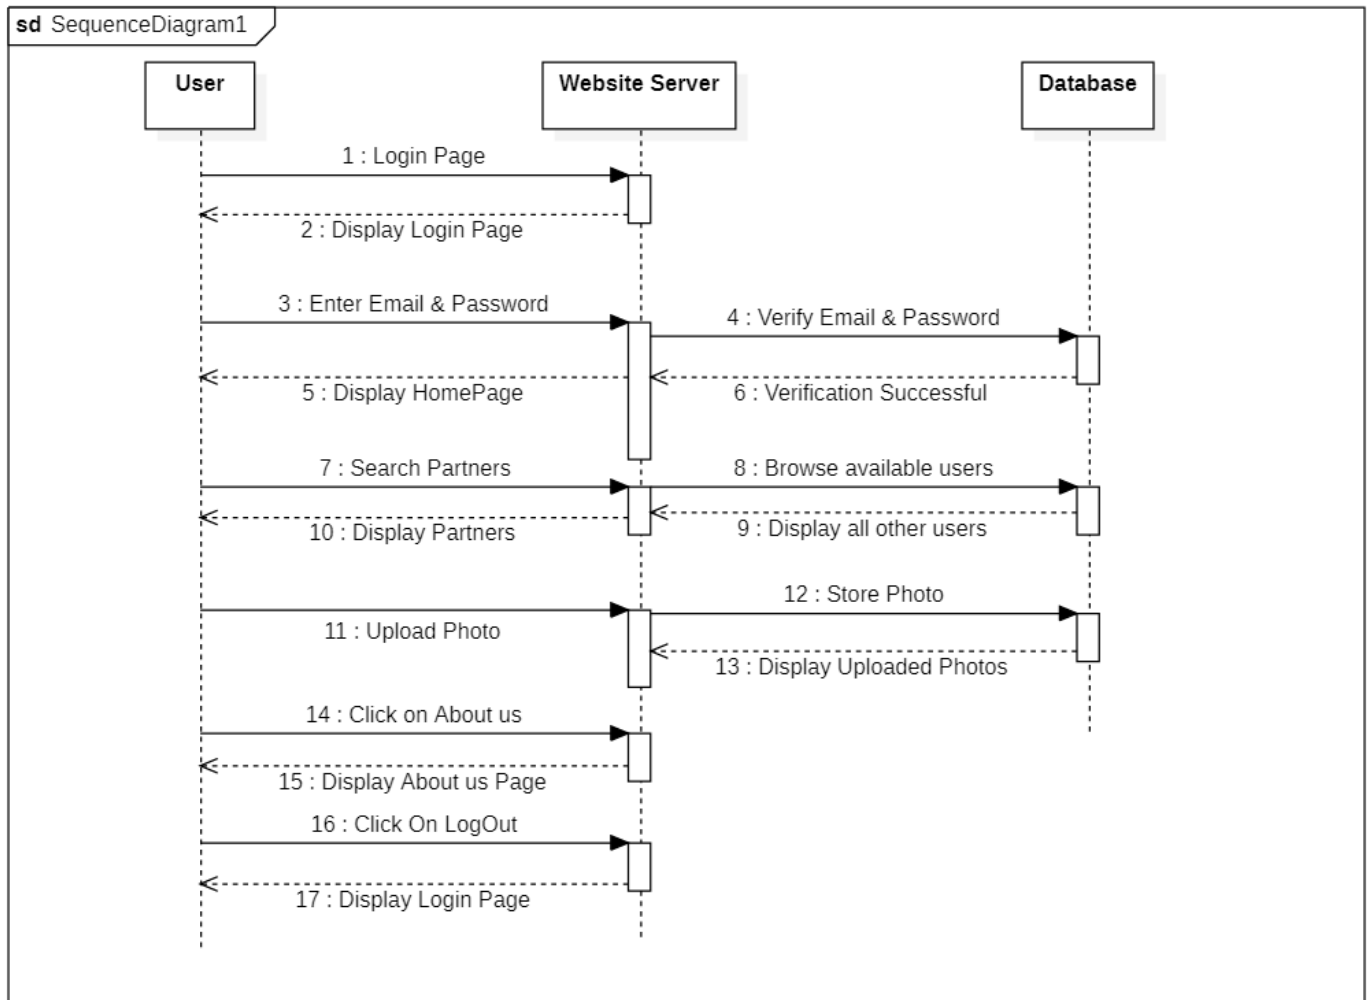

<b>Event</b>	<b>Trigger</b>	<b>Source</b>	<b>Activity</b>	<b>Response</b>	<b>Destination</b>
User wants to Register.	Register	User	User enters his/her details to register	Registration of the User.	Server
User wants to Login.	Login	User	Checks for the correct input.	Displays the Homepage when successful.	Server
User wants to explore the homepage.	Clicks on the arrows on the slideshow that has been presented.	User	Previews slides as per the user clicks	Displays the slides that provide short information regarding the site.	Server
User wants to fill his Personal details	Clicks "My Account" on the navigation bar.	User	User enters his personal details.	Saves the user information and displays some of it on the page.	Server
User wants to know more about the website's origin and motive	Clicks "About Us" on the navigation bar.	User	User can scroll through the information being shown.	Shows detailed information about the site's origin and its motives	Server

Welcome to Hitch&Hugs. The website that has never differentiated in-between other genders, race, sexuality, caste or creed.

This website emphasizes more on making people know each other rather than making them forcefully push themselves onto

each others lives, it allows them to know each other first and work on building the bond amidst them.

The first website to ever accept the LGBTQ+ community with open arms and welcome them into the sector where

they can find their better half and feel comfortable & safe about it at the same time !

```

## 6.2.7 About Us :

## 6.2.8 Footer :

## **7. CONCLUSION & FUTURE SCOPE :**

### **7.1 Future Enhancements :**

- Adding a better UI to improve user experience.
- Adding a Friend Request System.
- Adding Live Message Chat window.
- Adding Video Calling Window.
- Adding Premium Membership.
- Putting in more notifications about Alerts and Updates.
- Advancing in Encryption standards.
- Putting user support.
- Easier interface.

### **7.2 Conclusion :**

- The approach of this website was to provide an easier way for the users to meet new people and connect with them without having to be actually anxious while meeting them in real life.
- The purpose of choosing website was because of the easier programming languages
- With the feedback provided by my classmates, teachers and fellow guides there is still a he scope of advancement and improvement.
- The idea of this project was duly appreciated by them.
